

- ◆ Le Craftsmen uses standard HK sizing for all our rings.
- ◆ If you know your ring size that follows a different international standard, refer to our [Ring Size Chart](#) to find out your HK ring size.

◆ A. MEASURE CURRENT RING

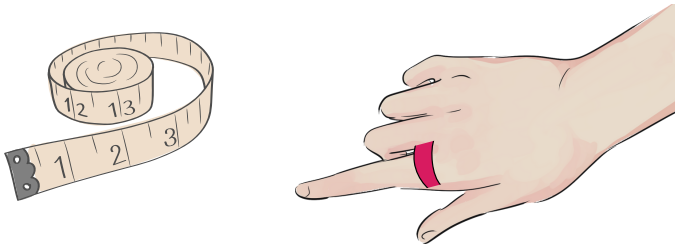

STEPS

1. Select a ring that properly fits the intended finger.
2. Use a ruler to measure the inside edge of the ring to the circle nearest in size. This measurement refers to the inside diameter of the ring. Refer to our [Ring Size Chart](#).
3. If the ring falls between two sizes, order the larger size.

◆ B. MEASURE FINGER CIRCUMFERENCE

If you don't know your ring size, you can measure the circumference of your finger using a tape measure. Refer to the circumference column on the [Ring Size Chart](#) to find out your HK ring size.

TIPS

1. Your finger size changes significantly throughout the day. It's advisable to measure your finger a few times, at different times and on different days to compare.
2. Take note to measure the finger that you intend to wear the ring on, as each of your fingers differ in size, which includes the same finger on different hands.
3. If your knuckles are the largest circumference of your finger, it's best to measure the circumference of your knuckle and consider that when deciding on your size. We recommend selecting a size that would go on and off your finger comfortably.
4. When looking at wider rings, we recommend selecting a slightly larger size.
5. When deciding between two sizes, we recommend opting for the larger one.

LE CRAFTSMEN[®]

RING SIZE CHART

CIRCUMFERENCE (MM)	DIAMETER (MM)	HONG KONG LE CRAFTSMEN	USA & CANADA	JAPAN
43.3	13.8	5	2.75	3
